Third Quarter 2023
CUNA Economics & Statistics

Third Quarter 2023

#### **Flying High**

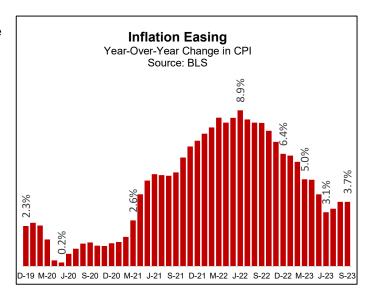

Gross Domestic Product (GDP), which measures the value of all goods and services produced in the U.S., increased at an eye-popping 4.9% annualized rate in the third quarter of 2023 – up from 2.1% in the second quarter. Compared to the second quarter, real GDP reflected accelerations in consumer spending and private inventory investment as well as a jump in exports.

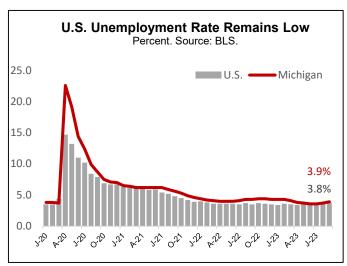

Inflation, measured by the Consumer Price Index, rose during the quarter. Prices increaseed 3.7% in the year ending September – suggesting the tail on the Fed's inflation front might be a bit longer than many observers expected.

The headline unemployment rate edged higher during the three-month period – starting the third quarter at 3.6% - and ending at 3.8%. The third-quarter-end reading came in just three-tenths of a point higher than the 3.5% level reported at the start of the COVID crisis.

Michigan's unemployment rate remained higher than the U.S. norm during the quarter, finishing at 3.9%.

U.S. non-farm employment gains increased, at a solid 630,000, up from 603,000 in the second quarter. In all, the nation's economy added 2.2 million jobs during the first nine months of 2023. At the end of the third quarter, total non-farm employment stood 4.4 million higher than pre-pandemic levels.

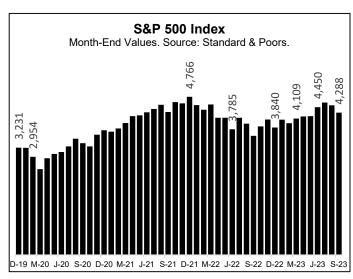

#### Third Quarter 2023

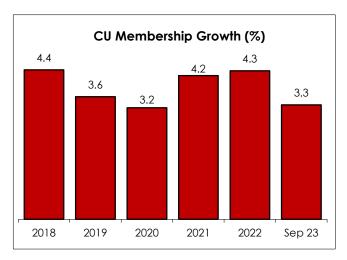

As expected, the Federal Reserve continued its efforts to bring inflation down, increasing the federal funds rate target by 0.25% at the end of July - which nudged the effective federal funds rate up to 5.3% - where it remained throughout the remainder of the quarter. The ten-year Treasury yield increased by 0.74% in the period (to 4.59% at the end of September) which cut the Fed Funds/10year inversion in half. Developments during the quarter suggest that Federal Reserve Policy makers are likely done with their rate hike regime in the current cycle. Even so, pressure on credit union net interest margins should be more obvious due to the combination of additional supervisory pressures aimed at reducing persistent liquidity challenges, and fierce competition for retail deposits. The S&P 500 Index declined 3.6% during the third quarter but remained quite high from a historical perspective. The broad index ended September at 4,288 – which was 11.7% higher since the start of the year. Year-over-year performance was very strong, with a 20% increase. And the broad equity index finished up 45% compared to its pre-Covid crisis reading of 2,954 at the end of February 2020.

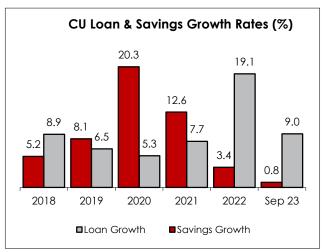

On the housing front, overall market activity was mixed. New home sales, which accounted for roughly 16% of total sales - were up 1.8% compared to second quarter levels but existing home sales were down 5.4% in the period. Overall home sales were down 4.4% in the third quarter. The FHFA all-transaction home price index rose at a 1.9% annualized rate in the quarter. The price index stood 4.8% higher than its third-quarter 2022 (i.e., year-ago) reading and it is 47.9% higher than prepandemic readings.

The FHFA all-transaction home price index for Michigan increased by 2.2% in the third quarter and was up 6.7% in the year.

Credit union third-quarter financial results reflect healthy (but lower) earnings, solid (but slowing) membership growth, modestly lower loan growth, and a decline in savings balances. Shifting risk profiles were again pervasive.

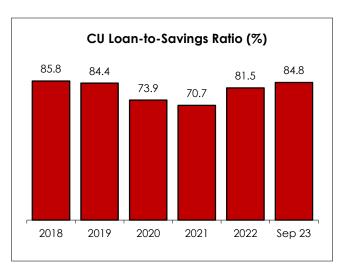

Memberships increased by 0.8% (i.e., 3.2% annualized) in the three months ending September and by 3.3% year-over-year. In contrast, the Bureau of Economic Analysis estimates U.S. population grew by 0.2% in the quarter.

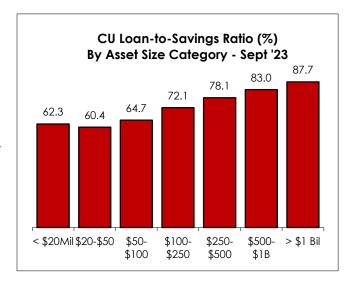

Credit union loan balances grew by 1.8% (7.2% annualized) in the third quarter. This represents a slowing compared to results in both the second quarter (+2.2%) and year-ago third quarter (+5.4%).

HEL/2<sup>nd</sup> mortgages continue to lead – with a 6.2% quarterly increase (24.8% annualized). Credit cards, other unsecured personal loans and commercial loans followed with each of the three portfolios reflecting gains in the range of 2.5% to 3.5%. First mortgages increased 1.3% (5.2% annualized) while used autos were up 1.0% (4.0% annualized) and new auto loans increased only 0.2% (0.8% annualized) with both tight liquidity and the increases in dealer incentive financing continuing to present challenges to credit union originating volumes.

On the liability side of the credit union balance sheet deposits declined for the second consecutive quarter. Overall, credit union savings fell 0.1% in the quarter (a -0.4% annualized slide.)

Consumers have largely used up pandemic-related "excess savings" as they try to navigate high inflation and big increases in borrowing costs. Many are continuing to seek higher yielding money market mutual fund yields and shifts from lower-yielding short-term credit union savings accounts to higher-yielding term certificate accounts persists. Credit union certificate accounts increased by 9.9% in the quarter - an astounding 39.6% annualized pace. Certificate balances have increased at or near double-digit percentage rates in each of the past four quarters.

Credit union IRA accounts increased marginally reflected in a 0.7% quarterly increase (2.8% annualized). Each of the other four credit union savings portfolios declined – with the most pronounced outflows in money market share and regular share balances which declined 4.2% and 3.2% respectively over the three-month period.

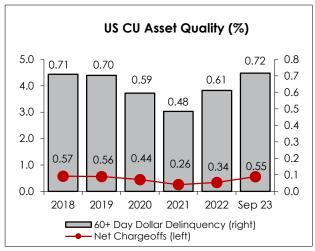

With loans growing and savings balances declining, the movement's loan-to-savings ratio increased from 83.1% to 84.7% in the quarter. The September loan-to-savings ratio eclipsed the pre-pandemic level of 84%, and many (especially larger) credit unions continue to navigate challenges with tight liquidity – a situation that is unlikely to change meaningfully over the next year.

Asset quality deteriorated. The 90+day dollar delinquency rate increased from 0.63% at mid-year to 0.72% at the end of September. And the movement's aggregate net charge-off rate increased modestly, from an annualized 0.54% at the end of June to 0.55% at the end of the third quarter.

Both loan delinquency and net charge-off rates continue to drift up from historic lows. The delinquency rate remains a bit lower than the long-run 0.95% average, but the net charge-off rate now is essentially equal to its long-run average reading.

Michigan credit unions generally mirrored these national trends.

Credit union interest rate risk exposure eased a bit – with net long-term assets inching down from 41.8% of total assets at the end of the second quarter to 4.14% at the end of the third quarter. Small credit unions reflect substantially lower exposure than their larger counterparts.

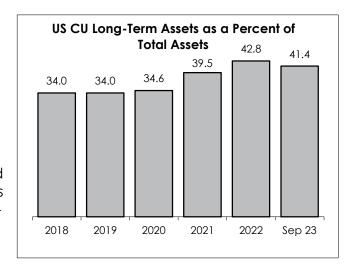

Supervisory authorities have been looking very closely at these exposures and are scrutinizing credit unions that reflect large recent increases. Good documentation and solid, defensible modeling will continue to be critically important.

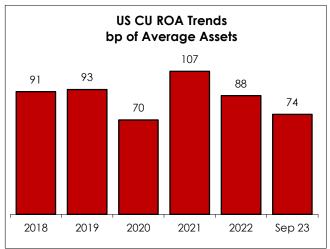

Credit union earnings continued to soften, with a third-quarter 2023 annualized average bottom-line ROA of 0.67%. That's a healthy reading but lower than both the 0.77% total in the second quarter and the 0.88% total in full-year 2022. Net interest margins increased by two basis points in the quarter as a 23-basis point increase in asset yields just outdistanced the 21-basis point increase in dividend/ interest costs. Fee and other income fell four basis points in the three-month period and loss provisions increased by seven basis points. A two basis point increase in operating expenses also added to the challenge of overall earnings declines.

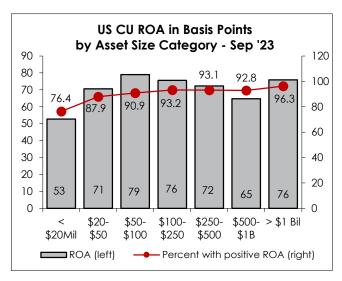

Average annualized ROA for the quarter ranges from a low of 53-basis points within the \$20 million or less asset category to a high of 79 basis points in the \$50-\$100 million asset category. Overall, 24% of those in the smallest asset category operated in the red during the quarter while only 3.7% of those in the largest asset category experienced that challenge.

As expected, smaller credit unions DID, once again, see earnings results improve during the quarter due mostly to stronger demand in the unsecured lending arena and ample liquidity (i.e., less pressure on funding costs). In contrast, larger shops continued to report marginally lower earnings results mostly due to relatively tight liquidity (forcing higher funding costs) and higher loss provisions.

The movement's net worth ratio held steady, with the impact of lower earnings being offset somewhat by slow asset growth. Overall, the credit union net worth ratio started the year at 10.7% and ended September at 11.0%. Movement-wide, 97.6% of credit unions are well capitalized with net worth ratios over 7% at the end of the third quarter. That's up from 96.9% at year-end 2022 and up from a calendar-year-end cyclical low of 95.2 in 2021.

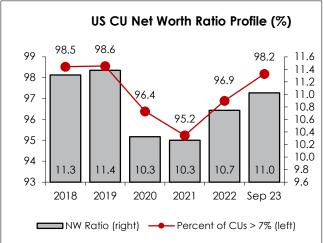

Third Quarter 2023

It should be noted that although small credit unions generally report relatively low earnings, they also report very high capital positions. For example, the nearly 1,500 credit unions with \$20 million or less in assets reflect an average net worth ratio equal to 15.4% of total assets at the end of September.

Credit unions started 2023 in generally good financial shape and nearly all should have the resources to continue to serve in meaningful ways. CUNA economists expect slower economic growth as the Federal Reserve continues to aggressively combat inflation. This will undoubtedly lead to more obvious labor market disruption and give rise to associated stress in consumer finances. In turn, those challenges are likely to be more obvious in credit union operating results.

Even so, credit unions routinely shine in tough economic environments because they remain engaged and actively seek to help members navigate financial disruptions. Conversely, for-profit financial firms have a fiduciary obligation to protect shareholder value so they are much more likely to turn potential borrowers away and defend earnings (and quarterly shareholder dividend payments) by, for example, offering low yields on savings accounts.

Economic disruptions can be both challenging and costly but they also represent an important opportunity for credit unions to meaningfully engage with members.
