

AUTOBOOKS FINANCIAL TOOLS

Small business owners want big solutions

Most financial institutions don't offer accounting and bookkeeping services to small businesses. That makes it hard to stand out in the crowd or differentiate from your retail offerings. Autobooks is a cloud-based, fully automated invoicing and accounting tool that helps credit unions capture more business at every step of the cash flow cycle by seamlessly integrating tools at each stage.

Autobooks will give your credit union a powerful advantage by combining cash, accounts receivables, accounts payables and accounting into a single platform so your members can manage their finances with no difficulties.

You want to offer your small business members a unique financial-related experience, heads and shoulders above the rest. Autobooks delivers what other small business accounting tools cannot — immediate access to a suite of smart cash flow tools, such as invoicing, payment acceptance and accounting — all through their online credit union account.

AUTOBOOKS

By leveraging Autobooks' financial tools, your credit union will work smarter, not harder

Running a small business has its uphill challenges; we provide a solution that promises speed, ease and data-driven cash flow management. Members can get paid up to 55% faster by using the automated payment processing feature. To keep track of invoices and payments, users can also set up vendor payment reminders and automatic disbursements. Additionally, you and members can view financials in real-time with integrated payment tools, external account aggregation and the account activity tracker function, making it a win-win for you and your small business members.

How is Autobooks different from the competition?

It's an all-in-one solution that eliminates the need for other bookkeeping, invoicing or payment software. Autobooks' easy-to-navigate financial tools speed cash flow, reconcile accounts and accelerate growth. It is designed by financial automation experts to make running a business easier for you and your business members. Autobooks is smart, simple and secure. The platform is PCI compliant and employs the highest level of encryption security available.
