First Quarter 2019
CUNA Economics & Statistics

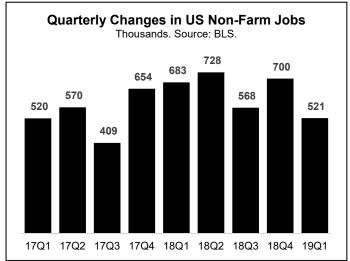

The U.S. Economy Bounces Back from Government Shutdown

The U.S. economy surprised on the upside, growing at a 3.1% annualized pace in the first quarter of 2019 – despite the government shutdown and associated financial market volatility. First-quarter increases in state and local government spending, along with accelerations in private inventory investment and in exports combined to deliver the surprisingly solid results.

The labor market remained close to full employment with the unemployment rate starting the year at 3.9% and finishing the first quarter at 3.8%. In Michigan, the unemployment rate held steady at 4.0% throughout the first quarter. Overall, the economy added a healthy total of 521,000 jobs over the three-month period.

Inflation remained below the Federal Reserve's 2.0% target rate throughout the quarter, so policy-makers paused,

holding the federal funds interest rate steady throughout the period.

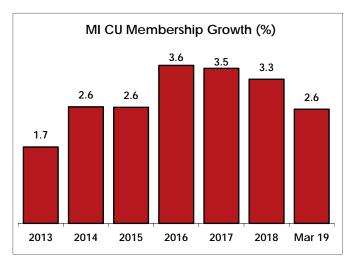

Solid Credit Union Results

The strong economy was reflected in Michigan credit union operating results during the first quarter, with solid growth in memberships, continued strong asset quality and healthy earnings. Normal first-quarter seasonal patterns were evident in strong savings growth and relatively weak loan growth.

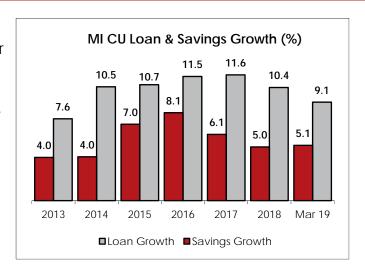

Michigan credit unions reported a 1.0% increase in total memberships in the first

quarter of 2019. The first-quarter gain outpaced the 0.7% increase in the fourth-quarter of 2018 but was a bit slower than the 1.2% gain in the year-ago period. Overall, memberships in Michigan credit unions increased by 2.6% in the year ending March 2019 – a bit of a deceleration compared to full-year 2018 results. Michigan credit unions now report a total of 5.42 million memberships.

As is typically the case, credit union savings balances grew relatively fast in

the first quarter with tax refunds flowing in to various savings accounts. Of course, for many credit union members, refunds were higher in 2019 due to 2017 tax reforms which lowered tax rates for many. The 5.6%, three-month increase in credit union savings balances was over four times higher than the fourth-quarter 2018 increase and higher than the 4.6% increase during the first quarter of 2018. On a year-over-year basis, Michigan credit union total savings balances were up 5.1%.

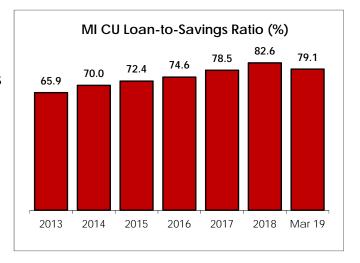

Michigan credit union share draft balances were up 9.0% while certificates increased 7.2% and regular share balances increased by 6.2% during the quarter. Each of those results is an unannualized rate of growth.

Michigan credit union loan portfolios grew by 1.2% in the first quarter of 2019—below both the 1.5% fourth quarter gain and the 1.6% year-ago quarterly increase. Overall, 12-month loan growth came in at 9.1%, more than one percentage point lower than full-year 2018 growth and well below the 11.6% pace of loan growth in 2017.

Commercial loan portfolios reflected the most significant gains, increasing 5.2% in the first quarter. Firsts mortgages were up 2.5% in the quarter and HEL/2nd mortgages increased 2.0%.

As is normally the case in the first quarter, both credit cards and unsecured personal loan balances declined as members paid down their holiday spending obligations.

With fast savings growth and relatively slow loan growth the aggregate credit

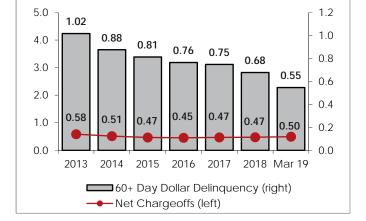

union loan-to-savings ratio declined modestly – from 82.6% at year-end 2018 to 79.1% at the end of March 2019.

Asset quality held fairly steady near cyclical highs in the first quarter. The aggregate credit union delinquency rate declined from 0.68% at the start of the year to 0.55% at

the end of the first quarter. Annualized first quarter loan net chargeoff rates were up slightly to 0.50% from 0.47% compared to full-year 2018 results. Expectations for continued strong labor market performance signal the possibility of continued healthy asset quality.

Michigan credit union annualized earnings results increased fairly dramatically in the first quarter mostly because net interest margins increased by nearly twenty basis points and

MI CU Asset Quality (%)

operating expenses declined by fourteen basis points.

Asset yields increased by ten basis points and funding costs declined by a nearly identical amount as shown in the table below. Noninterest income was modestly lower though lower loss provisions nearly offset that decline in income. Credit union annualized ROA (net income as a percentage of average assets) registered 1.10% in the first quarter – up from 0.76% in the fourth quarter of 2018. While the quarter-to-quarter differences were dramatic, the first-quarter annualized earnings rate was only ten basis points higher than full-year 2018 results (which included an approximate five basis point insurance fund equity distribution earlier in the year).

MI CU Earnings (Basis Points)	2019 Q1	2018 Q4
Yield on total assets	394	384
-Dividend/interest cost of assets	66	75
=Net interest margin	328	309
+Fee & other income	160	164
-Operating expense	345	359
-Loss Provisions	33	36
= Net Income (ROA)	110	76

Despite strong earnings results, strong savings (and hence asset) growth pushed the Michigan credit union capital ratio modestly lower in the first quarter. The net worth to asset ratio started the year at 12.1% and finished the first quarter at 11.8%. Nevertheless, the recent reading remains near an all-time high.

A More Challenging Economic Outlook

The U.S. and Michigan economies should grow at a healthy but slower rate over the next several years. Still, CUNA's baseline forecast calls for no recession over the next

eighteen months - which means the longest economic recovery in modern U.S. history should continue.

Personal Consumption Expenditures account for 70% of US economic activity and consumer finances are in great shape overall.

But demographic trends (substantial numbers of retiring baby boomers with lower spending/borrowing) combined with relatively low productivity growth virtually guarantee that overall economic growth will be constrained going forward. Near-term downside risks to the economy are modest but growing –reflected in increasing financial market volatility. However, barring big exogenous shocks (i.e., allout trade war, large-scale military conflict) any contraction in economic activity should be very brief and mild form a broad historical perspective.

Expect the labor market to remain near full employment for the foreseeable future. Workers have a high number of job opportunities with the number of job openings greatly exceeding the number of people looking for work. This is a historically unprecedented situation – and one that is unlikely to change dramatically over a short period of time.

Inflation pressures should remain tame over the forecast horizon. Wages are rising only modestly, and energy prices are remarkably low & increasing slowly – unusual for a mature recovery – but consistent with international weakness.

With a continued healthy employment situation and low (and controlled) inflation we see no big changes in Federal Reserve monetary policy over our forecast horizon.

* Percent change annual rate. All other values are	end of period.		

Consumers in Good Shape Overall

Continued labor market health means that wages are likely to continue to increase a bit faster than inflation going forward.

Equity market performance has been unsteady but stock markets recently hit an all-time high. Roughly 55% of households have an ownership interest in stocks. Home prices are increasing at healthy rates – helping to boost home equity close to pre-crisis highs. Roughly two-thirds of households have an ownership interest in the housing market.

Debt levels as a percent of take-home pay are declining and debt service burdens (i.e., monthly required payments) as a percent of take-home pay are near all-time lows. This suggests that the consumer sector is likely to stay engaged – buying and borrowing – for the foreseeable future. Continued low market interest rates should help to boost this activity.

With substantial increases in asset values and declining liability exposures, household net worth is near an all-time high. Wealthy consumers are more likely to be purchasing goods and services and higher levels of household net worth are generally associated with higher borrowing.

Consumer confidence has been buoyed by these developments – further suggesting continued spending and healthy demand for durable goods (big-ticket items like cars and houses).

Still, Federal Reserve data continues to show large numbers of household living paycheck-to-paycheck.

Expect Generally Favorable Credit Union Results

Fast (but slowing) membership growth should remain well above 0.8% U.S. population growth. Credit unions continue to deliver substantial financial benefits in the marketplace – and consumers clearly value that.

Loans should grow at healthy (but slowing) rates in the coming months as solid wage growth, and low debt levels combine with high consumer confidence to buoy results. Auto tariffs could be especially problematic – but our baseline forecast reflects the expectation that the most damaging policy proposals will be avoided.

Expect continued tight credit union liquidity (reflected in high loan-to-share ratios), but lower exposures to interest rate risk and very high asset quality. Asset quality (both delinquency and net charge-off rates) are highly correlated with the U.S. unemployment rate.

Healthy and fairly stable earnings should be evident across the forecast horizon as asset yields should remain above funding costs. Note, however, many credit unions will be paying more for deposits to help reduce liquidity risks – a focus of supervisory teams in the current environment.

Michigan credit union capital positions are nearing their pre-recession peak – and the combination of healthy earnings and relatively slow savings and assets growth will help to push this ratio higher.

Concerns over the forecast horizon include significant variation in results by size and a continuation of substantial credit union consolidation.

Earnings & net chargeoffs are annualized quarterly results not seasonally adjusted. Growth rates are not annualized. Delinquency rates are 60+ day dollar delinquencies. Net chargeoffs are dollar chargeoffs net of recoveries. Totals include only credit unions that are released on the NCUA 5300 Call Report file.

^{*}Prior to third quarter 2017, these were reported as member business loans. This change may cause fluctuations from prior cycles.
