Michigan Credit Union Profile

Mid-Year 2020
CUNA Economics & Statistics

A Crisis of Historic Proportions

In three short months a global COVID-19 pandemic gave rise to the worst economic catastrophe in modern U.S. history.

President Trump declared a COVID-19 state of emergency immediately prior to the start of the second quarter (March 13th). At that time, there were only 1,645 cumulative COVID-19 cases in the U.S. Two weeks later, at the beginning of the second quarter, the total was ten times higher – over 165,000 nationally according to the Center for Disease Control and Prevention.

By early April, 42 states and territories issued mandatory stay-at-home orders, affecting 73% of all U.S. counties. Concerted efforts to "flatten the curve" were largely ineffective and the number of cases ballooned to a cumulative total of 2.6 million at the end of June. By the close of the second quarter 128,000 U.S. citizens had perished.

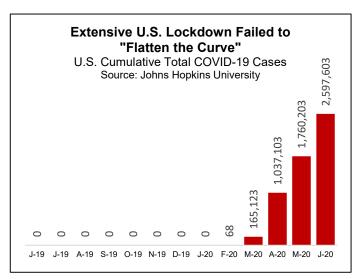

In Michigan, statewide cumulative COVID-19 deaths increased from a total of 337 to 6,197 over the three-month period.

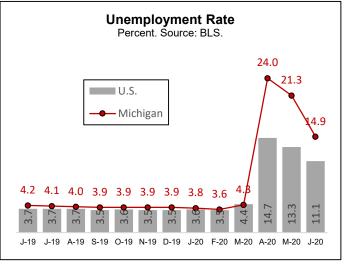

Against this backdrop, U.S. non-farm employment declined by 20.8 million in April and the nation's unemployment rate shot

up to an 80-year high of 14.7% at the end of the month. In Michigan, the dislocation was more pronounced with a peak unemployment rate of 24.0% in the month of April.

Swift monetary and fiscal policy responses helped to greatly soften the blow. Massive government pandemic assistance payments were distributed to households and businesses – which helped to buoy the stalled economy.

In addition, by the end of the quarter all but a handful of states had either terminated stay-at-home orders or transitioned from mandatory to advisory orders. Labor markets and job prospects improved as economies opened but employment finished the quarter down 13.3 million over the three months ending June and the unemployment rate stood at 11.1% - more than one percentage point higher than the peak level recorded in the Great Recession. The "third" estimate of U.S. GDP shows that the national economy contracted at a record annualized rate of 31.4% during the second quarter.

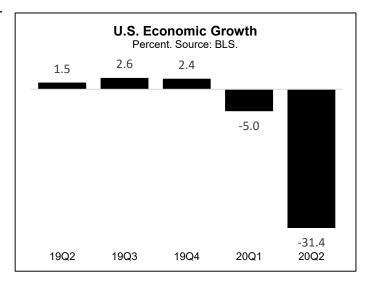

The Federal Reserve federal funds effective rate started the quarter at 0.08% and ended the quarter at that same reading. The ten-year Treasury yield started April at 0.62% and was

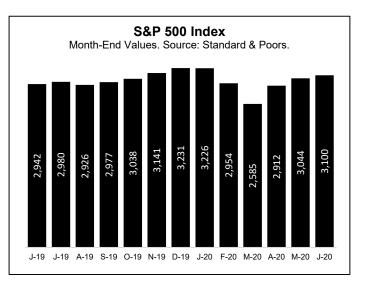

essentially unchanged, ending June at 0.66%. The spread between the Fed's overnight benchmark interest rate and the 10-year Treasury yield held steady throughout the quarter at roughly 0.55%.

With near-zero market interest rates and massive liquidity inflows into the economy, financial market volatility eased substantially and equity markets advanced: The S&P 500 gained nearly 20% in the second quarter.

Total home sales (new and existing) were down at an annualized 6% pace in the second quarter. But mortgage interest rate averages were trending down (finishing the period at an all-time low of 3.13%) and sales increased at a fast pace in the final month of the quarter. The FHFA All-Transactions National Home Price index increased at an annualized 2.9% rate in the three-months ending June. Home prices increased at an annualized rate of 3.5% in Michigan during the second quarter.

The COVID-19 recession differs greatly from what was experienced during the Great Recession. The country avoided both a financial crisis and significant housing market dislocations in the second quarter. On the other hand, labor market disruptions and the overall economic contraction has been

comparatively much more pronounced during the COVID-19 crisis. The second quarter was an incredibly challenging period for the country, for credit union members and for credit unions.

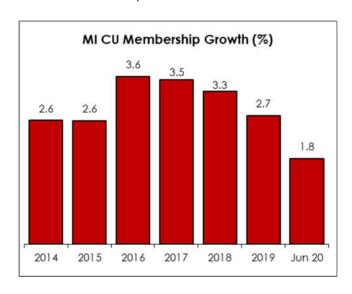

Still, the nation's member-owned, not-for-profit depositories did what they always do in crisis – they rose to the occasion, engaged with members, and helped millions navigate the uncertainty in an attempt to get them through the crisis quickly and with as little disruption as possible.

In a recent CUNA survey, 86% of credit unions (serving over 90% of credit union members) indicated that they introduced new loan products to meet the pressing needs of member; 90% indicated that they waived fees; 95% said they modified loans.

Collectively, credit unions originated nearly 200,000 Small Business Administration Paycheck Protection Program loans, totaling roughly \$10 billion. The median loan size on credit union PPP loans was approximately \$34,000 and the average loan size was \$49,000 – about half the size reported by banks - a clear indication that credit unions were firmly focused on small, local, mom-and-pop, independent businesses – not professional sports teams, national chain restaurants and the like. Cornerstone Advisors, the consultancy, reports that credit union PPP loans accounted for more jobs retained per \$1 million lent than any other PPP lender.

Overall, Michigan credit unions experienced steady membership growth with stronger loan growth and big savings inflows in the second quarter. Asset quality improved and earnings rates increased. Net worth ratios fell from near-record highs in the face of strong asset growth.

Credit unions in the state reported a 0.5% increase in total memberships in the second quarter of 2020. The year-over-year increase was 1.8%, which is nearly five times faster than five-year average in state population growth. In total, Michigan credit unions now report 5.56 million memberships – equal to 56% of total state population.

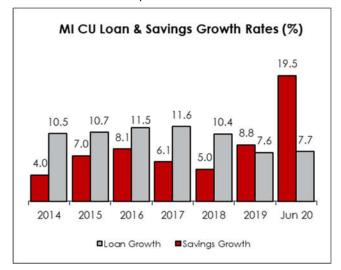

Great Lakes State credit union loan portfolios grew by 2.9% in the second quarter – a solid 11.6% annualized pace. That's about four times faster than the first quarter increase and is a bit

faster than the 2.6% year-ago increase. Year-over-year loan growth came in at 7.7%.

Looking forward, expect relatively weak loan portfolio growth in the third quarter against a backdrop of the continuing COVID-19 crisis and lower mortgage refinancing activity. CUNA economists expect loan growth to decelerate from an annual 6.5% pace in 2019 to 6.0% in both 2020 and 2021.

An examination of second quarter growth within the seven broad portfolios tracked on Michigan credit union call reports reveals unsecured personal loans led the way in the

second quarter with an (unannualized) increase of 26.9% - mostly due to strong demand for SBA PPP loans. As alluded to earlier, first mortgages also reflected a strong increase (+4.6%) because mortgage interest rates were near all-time lows. Used autos were up 0.5% in the three months ending June. Each of the other broad portfolio segments reflected declines in the second quarter.

1.0

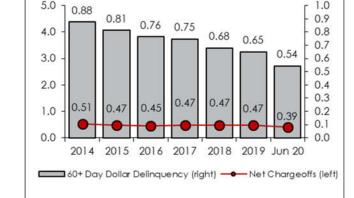

Michigan credit union savings growth was incredibly strong in the second quarter – reflected in an 11.5% increase in balances (a 46% annualized gain). That compares to a 5.0% increase in the first quarter and only a 1.3% increase in the second quarter of 2019. Big deposits of federal government stimulus checks and big sweeteners in unemployment benefits drove the increases.

Share drafts increased at an astounding 22.3% (unannualized) pace in the second quarter and both regular shares and money market accounts followed closely with unannualized quarterly gains of 17.6% and 11.5%, respectively. Against a backdrop of anxiety related to the global COVID-19 pandemic, CUNA's baseline forecast has credit union savings expanding quickly with total balances expected to increase by nearly 19% in 2020 and by 8% in 2021.

With Michigan credit union savings balances growing substantially faster than loan portfolios, the movement's loan-to-saving ratio declined, finishing the guarter at 71.9%. The mid-year reading is lower than the 82.6% cyclical high reported at year-end 2018 and will likely dip further as strong savings growth will persist. Nationally, the credit union loan-to-savings ratio is likely to finish 2020 at about 75% and is apt to decline by an additional two percentage points in 2021.

Asset quality actually improved in the second quarter – despite mass layoffs and weak loan growth. Of course, the aforementioned fiscal stimulus activity (including large stabilization deposits, favorable unemployment benefits and SBA PPP lending) combined with substantial loan modification activity and mortgage refinancings (that reduced monthly debt payment burdens) all contributed to produce this result.

Michigan credit union loan delinquency rates inched down in the aggregate, from 0.59% at the start of the quarter to 0.54% at mid-year. The net chargeoff rate also declined, from

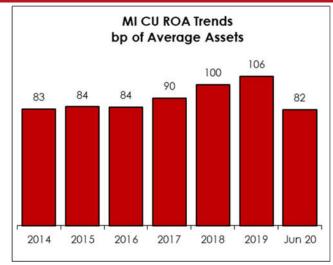

MI CU Asset Quality (%)

0.47% in the first guarter to 0.33% in the second guarter of 2020.

Bankruptcies filings eased, with bankruptcies per thousand credit union members falling from 2.06 in 2019 to an annualized 1.76 in the first half of 2020. Increases in bankruptcy filings and a corresponding erosion in credit union asset quality may be obvious in the coming months – and into 2021 – as unemployment stays naggingly high, federal stimulus activity wanes, and loan forbearance periods expire.

Overall, Michigan credit unions reported strong earnings in the second quarter, with annualized ROA (net income as a percentage of average assets) totaling 0.91% in the period. That's up from 0.74% in the first quarter but down from 1.06% in 2019. Lower operating expenses accounted for most of the quarterly earnings improvement.

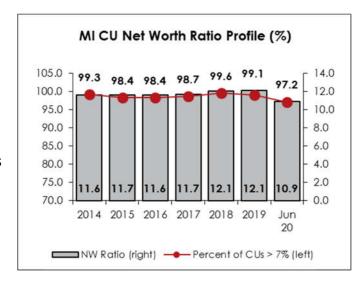

The aggregate Michigan credit union net worth ratio declined due mostly to very fast savings (hence asset) growth. The movement-wide average net worth ratio stood at a 10.9% at mid-year – down from 11.8% at the start of the second quarter. The current reading is 1.3

percentage points off the post-recession high reported at the end of the third quarter 2019. Even so, over 97% of the state's credit unions remain well capitalized with net worth ratios over 7%. Credit unions remain in generally good financial shape at mid-year and nearly all should have the wherewithal to continue to serve at a high level and in meaningful ways as members struggle to make it through their continuing pandemic and financial challenges.

Although the COVID-19 crisis is far from over, there are clear signs that the economy is recovering at a relatively fast pace, including an uptick in consumer spending, a greater-than-expected fall in unemployment and a strong rebound in manufacturing.

Most economists now expect a robust third quarter of economic growth. CUNA economists forecast relatively strong growth in real GDP of 25.0% in the third quarter followed by slower growth of 5.0% in the fourth quarter. Despite a relatively quick rebound, this would put the nation's economic contraction at -3.4%, the largest annual decline in economic activity on record.

Next year expect growth to gradually recover as a vaccine and other preventative measures (such as more widely available testing with real-time results) are rolled out; however, many sectors will struggle to rebound, particularly those related to tourism, travel, and food services. We do not expect GDP to return to its 2019 year-end level until the middle of 2021.

Under our baseline assumptions, economic growth will rebound relatively quickly with production and service-sector activity resuming, and pent up consumer demand driving growth. Moreover, unlike the experience in the 2007 – 2009 financial crisis, financial markets are likely to remain intact which—combined with historically low interest rates—will further stimulate the economy. We therefore expect overall economic growth in 2021 to reach 3.5%

Michigan Credit Union Profile

Mid-Year 2020

followed by a gradual return to the long-term sustainable growth rate of approximately 1.8% by 2024.

The unemployment rate is likely to continue to fall but at a slower pace, since the remaining jobs lost are concentrated in industries that are particularly hard hit, such as travel, tourism, retail and food services. We expect the official BLS unemployment rate to reach 7.5% by yearend 2020 and 6.5% by the end of 2021.
