Mid-Year 2021
CUNA Economics & Statistics

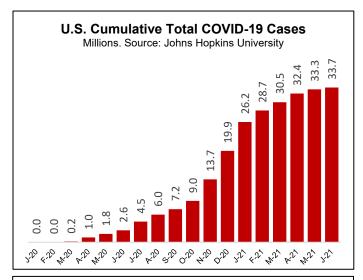

Back to Normal?

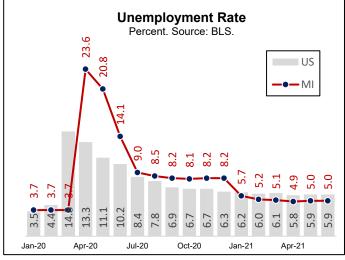

General seasonal trends combined with widespread availability and increasing acceptance of effective vaccines to help Covid-19 cases plateau in the second quarter. Confidence in a return to normalcy increased substantially and this was, in turn, reflected in solid economic data and in favorable credit union operating results during the period.

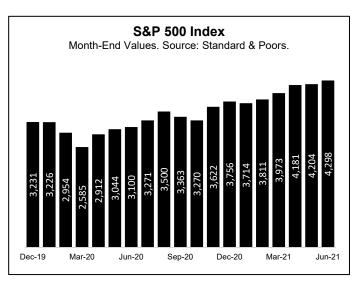

Gross Domestic Product, which measures the value of all goods and services produced in the U.S., grew at 6.6% annualized rate in the second quarter. This strong performance puts the annualized real GDP value at \$19.4 trillion, which is a bit higher than the pre-pandemic peak of \$19.2 trillion reported in the fourth quarter of 2019.

The U.S. unemployment rate finished the second quarter at 5.9% - marginally lower than the 6.1% reading reported at the start of the quarter. Non-farm employment rose by 1.9 million in the three months ending June – once again indicating more widespread economic openings as pandemic fears eased. Still, overall employment remains 6.6 million lower than pre-pandemic levels nationally. Michigan's unemployment rate remains lower reflected in a 5.0% mid-year reading.

As expected, the Federal Reserve federal funds effective rate was essentially unchanged during the quarter. In contrast, the ten-year Treasury yield declined by 29 basis points during the three-month period as investors dialed-back expectations for fiscal and monetary stimulus. The long bond yield stood at 1.74% at the start of the quarter but sunk to 1.45% by the end of June. The spread between the Fed's overnight benchmark interest rate and the 10-year Treasury yield thus declined during the quarter – from 1.68% at the end of

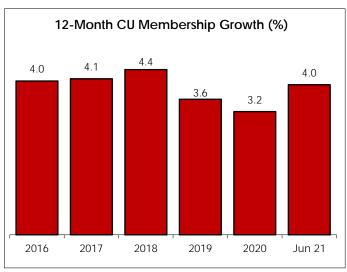

March to 1.37% by June's close. On the margin, that will put downward pressure on credit union net interest margins.

The S&P 500 gained momentum in the second quarter, increasing by 8.2% in the period. That's well above the strong 5.8% first quarter gain. On an annualized basis, those increases were 33% and 23%, respectively. The index is up 43% compared to the pre-Covid Crisis reading of 2,954 at the end of February 2020.

Total home sales (new and existing) decreased in the second quarter with seasonally-adjusted annualized sales of 19.7 million units – nearly 9% lower than the 21.6 million pace reported in the first quarter. That reflects the fact that the average 30-year fixed mortgage interest rate increased from 2.88% to 3.00% during the three-month period. Sales also eased because prices continued to rise rapidly. The average price for home purchase mortgages increased by 17.4% in the year ending June 2021 according to the National Association of Realtors. **Prices on purchase money mortgages in Michigan increased by 17.3% in the year ending June 2021 according to the FHFA.**

Against this backdrop, credit unions reflected very strong earnings, strong membership gains, fast loan growth, and substantially slower savings growth during the second quarter. Asset quality –stands at record high levels (i.e., both loan delinquency and net chargeoff rates are at historic lows). The growth rate in credit union loans outpaced the growth rate in savings balances for the first time since the start of the pandemic. Still, credit unions remain awash in liquidity. Weaker savings (hence asset) growth and very strong earnings helped to push the movement's net worth ratio higher in the quarter.

Michigan credit union results again generally mirrored these national trends.

Credit union memberships increased 1.3% (5.2% annualized) in the three months ending June. This represents the fastest quarterly credit union membership growth since the third quarter of 2018 and it is nearly fourteen times faster than U.S. population growth (which was recently reported to be 0.35% by the Census Bureau – a 120-year low). Total credit union memberships stood at 129 million.

In the aggregate, the movement's loan balances grew by 2.5% in the second quarter (10% annualized). Commercial loans led the way, expanding at a 4.2% rate (13.2% annualized) in the period. Used automobile loans followed with a quarterly growth of 3.1% (12.4% annualized) and first mortgage loans nearly equaled that result reflected in quarterly growth of 2.9% (11.6% annualized).

Credit card balances bounced back from normal post-holiday payoffs in the first quarter, posting a 2.1% increase. New autos were up 0.8% and HEL/2nd mortgage loans grew by 0.3% (their first increase since the start of the pandemic). Personal unsecured loans declined by 0.6%. in the three-month period.

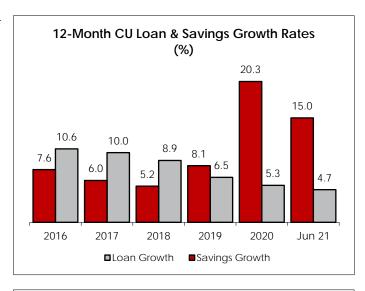

Total savings balances grew, but the rate of increase decelerated strongly compared to recent experience. Overall, credit union savings balances increased by only 1.4% in the second quarter – well below the first quarter's 6.8% pace. Year-over-Year savings deposits are up 15.0%.

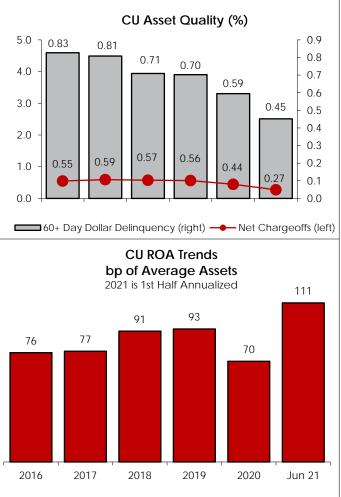

Consumers continue to keep funds short and liquid. Share drafts increased 4.9% in the second quarter while money market shares and regular shares followed with unannualized quarterly gains of 3.7% and 0.2%, respectively. IRA accounts increased 0.1% and certificates declined by 3.0%.

With loan growth outpacing savings growth the movement's loan-to-savings ratio increased from 68.7% to 69.5%. The increase is hopeful from an earnings perspective because strong growth in high-yielding assets like loans helps boost income. Still, the current reading of nearly 70% remains well below the pre-pandemic reading of 84%.

Asset quality reflected improvement in the second quarter. Net chargeoff rates declined to an all-time low of 0.24% (down from 0.32% in the first quarter). The delinquency rate was unchanged at 0.46% at the end of June. Bankruptcies per thousand credit union members in the first half fell to 0.9 from 1.1 in the first quarter.

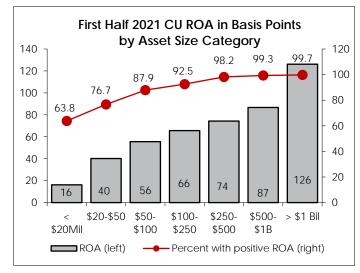

Credit union earnings again improved significantly. Industry-wide ROA increased 0.12% in the second quarter. The annualized 1.16% bottom-line result was the highest annualized quarterly earnings rate in over 15 years. The result was powered by a 0.16% decline in loss provisions – as credit unions continued to bring allowance

accounts back to normal levels. First half ROA totaled 1.11% - up from 0.70% in 2020 (a 10-year low).

It's important to note that the second quarter reflected large (and growing) variation across several key credit union performance metrics. This was especially obvious in the earnings results. As shown in the accompanying graphic, there was a 1.16 percentage point difference between average ROA in credit unions with \$20 million or less in total assets and those with \$1 billion or more in total assets. In addition, 34.0% of those in the smallest asset category operated in the red in the quarter, while only 0.3% of those in the largest category experienced that challenge (note that credit unions with \$50

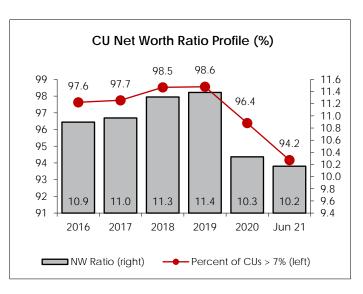

million or less in total assets account for roughly half of all 5,131 credit unions operating in the second quarter).

Smaller shops will likely see earnings results improve in coming quarters as the recovery advances and consumer borrowing in the auto sector and in unsecured loans gains momentum. In contrast, larger shops will likely see lower earnings results mostly due to higher loss provisions (allowance accounts as a percent of loans outstanding are now just ten basis points higher than pre-pandemic levels).

In any case, slower aggregate asset growth and generally higher ROA helped to buoy the movement-wide net worth ratio. The capital buffer began the quarter at 10.0% of total assets – but rose to 10.2% by mid-year. Overall, 94.2% of credit unions remain well capitalized with net worth ratios over 7%.

It should be noted that although small credit unions generally report relatively low earnings they also report very high capital positions. For example, the nearly 1,700 credit union with \$20 million or less in assets reflect an average net worth ratio equal to 13.8% of total assets.

Nationally, credit unions remain in generally good financial shape at the end of the second quarter and nearly all should have the wherewithal to continue to serve in meaningful ways as

Mid-Year 2021

millions of members struggle to make it through the continuing pandemic and related personal financial challenges.

Economic Outlook: "Toward" (Not "To") Normal

CUNA's economic outlook – updated on September 17th, reflects the fact that there now is substantially more uncertainty in the economy. Both consumer and business confidence have declined relative to readings seen during the second quarter. For many, August's disappointing jobs report – which reflected only 235,000 new jobs added – suggested any expectations for a more substantial acceleration in the rapidly reflating economy were misplaced. Chinese real estate markets are raising anxieties about the international outlook. Equity markets reflect increasing volatility.

Underlying concerns related to public health have again taken center stage. In the wake of the Labor Day holiday daily COVID cases were rising markedly with the more virulent Delta variant infecting more people and younger populations. Infection rates were widely reported to be three times higher than during the same period in 2020. Many hospitals were (and are) overwhelmed and healthcare workers in many areas are being pushed to the breaking point. Children now represent nearly 30% of COVID cases – many (of course) are ineligible for the vaccine. Many schools can't or won't adopt basic safety protocols called for by local public health officials.

What has emerged is a strong sense that COVID is with us. For good. The country isn't going back to "normal" – but it's likewise not going back to shutdowns.

There IS good news and a distinct possibility that the nation could see a transition to stronger employment numbers and perhaps even a tight labor market – and quickly. A number of key helpful trends worth watching include:

- Safe, effective vaccines are widely available: Today 75% of US adults now have had at least one dose and only 15% say they won't get it under any circumstances.
- Employment increases, while weak recently, have been broad-based within industrial sectors and geographically. Unemployment rates were lower in July in 17 states and the District of Columbia and stable in 33 states in the most recent BLS jobs report. In addition, there is a lot of opportunity in the market with a lot more job openings than unemployed (a return to the situation that existed throughout 2018 and 2019). In July, there were 8.7 million unemployed and 10.9 million openings. August unemployment fell to 8.4 million (the job openings for August will be reported October 12 and will almost certainly reflect higher openings.) Wages are rising at a decent rate and at the margin that will help to bring people back.
- Supply chain disruptions should ease especially in the auto and homebuilding industries. Census Bureau data shows aggregate business inventory-to-sales ratios are at all-time lows of approximately 34 days. And indices of current delivery times are at record highs in surveys of manufacturers by three regional Federal Reserve Banks. However, indices for future delivery times are now in their typical ranges. Overall, the

data suggests that manufacturers see current supply chain disruptions largely running their course over the next three to six months.

- Government policy retains extraordinarily leverage with Child Tax Credits, infrastructure spending, and a proposed budget with significant pre-funded social safety net expenditures.
- On the international front, global demand is picking up and seems to be on a solid trajectory.

Against this backdrop CUNA economists remain upbeat, though our newly minted forecast reflects a slightly-less rosy view of the future compared to our June outlook. We now see modestly lower economic growth – though the increases remain high by historical standards: a 6.0% increase in 2021 and a 4.5% gain in 2022 now seem likely. The long-run average annual growth in U.S. economic activity is approximately 2.75%.

	Actual	results	Qua	rterly res	ults/fore	casts	Anr	ual casts
	5 Yr Avg	2020	2021:1	2021:2	2021:3	2021:4	2021	2022
Growth rates:								
Economic Growth (% chg GDP)*	1.10%	-3.50%	6.3%	6.6%	4.5%	6.0%	6.0%	4.5%
Inflation (% chg CPI)*	1.90%	1.30%	4.9%	9.3%	5.0%	2.5%	5.0%	2.5%
Unemployment Rate (BLS)	4.60%	6.70%	6.0%	5.9%	5.2%	4.8%	4.8%	4.0%
Federal Funds Rate (effective)	1.18%	0.09%	0.07%	0.08%	0.10%	0.10%	0.09%	0.10%
10-Year Treasury Rate	2.08%	0.93%	1.73%	1.45%	1.40%	1.50%	1.50%	2.00%
10-Year-Fed Funds Spread	0.90%	0.84%	1.66%	1.37%	1.30%	1.40%	1.41%	1.90%

We continue to subscribe to the view that current elevated inflation pressures will be transitory – an outlook supported by the bond market's implicit forecast for inflation: The yield spread between the five-year Treasury and similar-maturity Treasury Inflation-Protected security remains at about 2.50%.

Labor market recoveries are seldom straight-line affairs, and it seems unreasonable to expect this one to be. Employment in the Leisure and Hospitality industry (hotels, restaurants, and theme parks) remains very low. The sector, which employed roughly 17 million pre-pandemic,

Mid-Year 2021

suffered a 50% decline in employment by April 2020 and continues to reflect a 10% decline (down nearly 2 million jobs) overall.

Still, the job market will continue to recover as the Delta surge wanes with full employment likely reflected in performance metrics by mid-year 2022. Expect the unemployment rate to finish 2022 at 4.0% - very close to pre-pandemic readings.

Fed Chair Powell has been clear that monetary policy will be accommodative until the economy reaches full employment – and those most severely impacted by the COVID-19 crisis begin to see real progress in returning to a semblance of normalcy. Long rates will rise, but more modestly than previously expected.

Credit Union Operations

Expect credit unions to be recovering – not "recovered" over the forecast horizon – with transition out of the pandemic economy largely mirroring developments in the labor market.

Monthly credit union savings growth has been a bit slower than we previously assumed. Accordingly, we've lowered our 2021 increase from 15% to 12% though we continue to believe growth in 2022 will be a bit lower than the long-run average increase – reflecting a gradual draw-down of the pandemic-related savings surge.

Loan growth will likewise rebound though gains are likely to be slower than previous economic recoveries due mostly to the slower pace of recovery in front-line employment.

The Mortgage Bankers Association's August forecast calls for a 16% decline in mortgage originations in 2021 and a 35% decline in 2022. If that outlook is applied to credit union activity the movement will see 2022 origination levels drop to 2019 levels (though it should be noted that 2019 was a record year for the movement's origination volume).

The IHS Markit August forecast suggests new auto sales will accelerate from 14.6 million units in 2020 to 16.4 million units in 2021 – a 13% increase. The 2022 increase is expected to moderate to 2% - putting overall sales in the year at about 16.8 million units - roughly 1% lower than "normal" pre-pandemic annual sales rates.

Other portfolio segments will see relatively fast growth – already evident in quarterly call report data. Credit cards, unsecured personal loans, used vehicle loans, and business loans all should reflect solid gains and continuing momentum as the economic recovery gains more obvious traction.

With loan growth expected to outpace savings growth next year, loan-to-share ratios will increase. All else equal this will help to buoy credit union earnings, but the resulting 72% year-end 2022 loan-to-share ratio will nevertheless be well below its 86% pre-pandemic peak reading.

We continue to believe that credit union asset quality will stay at healthy levels with only modest increases in both delinquency and net chargeoff rates.

Mid-Year 2021

CUNA forecasts that ROA will settle in close to 95 basis points for full-year 2021 (up from 70 basis points in 2020). That improvement reflects continuing mortgage refinancing activity (with associated gains on sales into the secondary market) and lower loan loss provisioning as credit unions "right-size" allowance accounts to pre-pandemic levels. It will clearly be difficult to repeat that result in 2022. Solid earnings and slower savings and asset growth should help to push credit union net worth up to 10.2%. If that forecast holds, the movement's aggregate capital buffer will finish the year one percentage point lower than the 11.2% pre-pandemic peak. For many, that suggests a future focus on rebuilding capital positions.
